130th Report of the Public Schools of Missouri

For the School Year Ending June 30, 1979

Issued by the Missouri State Board of Education
Delmar A. Cobble, President

Arthur L. Mallory, Commissioner of Education

Missouri State Board of Education

JEFFERSON BUILDING • JEFFERSON CITY, MISSOURI 65102

January 1, 1980

Members of the General Assembly
State of Missouri

Ladies and Gentlemen:

The State Board of Education herewith submits its One Hundred Thirtieth Report of the Public Schools of the State of Missouri. This report, prepared in compliance with Section 161.092, Missouri Revised Statutes, covers the school year ending June 30, 1979.

We hope the information contained in this report will be of interest and assistance to you as you consider the needs and major problems of the public schools of the State of Missouri.

Respectfully,

Delmar A. Cobble

Delmar A. Cobble
President, State Board
1978-79

Secretary, State Board of Education

The State Board of Education was established in its present form by the Missouri Constitution of 1945. The State Board of Education consists of eight lay citizens appointed by the Governor with advice and consent from the Senate. Article IX, Section 2(a) also states that no more than four members of the Board may belong to the same political party. State Board members are appointed for eight year terms which are arranged so that only one term expires each year. The Board elects its own officers.

The responsibilities of the State Board of Education extend from preschool through post-secondary and adult education programs. These responsibilities include:

- *Establishment of policies for the leadership, service and regulation of public education. These policies are administered by the Missouri Department of Elementary and Secondary Education.*
- *Operation of the State School for the Blind and the State School for the Deaf.*
- *Operation of State Schools for Severely Handicapped Children.*
- *Classification of schools and certification of teachers.*
- *Administration of vocational education, vocational rehabilitation and veterans' education programs.*
- *Administration and supervision of programs under the Elementary and Secondary Education Act of 1965 and other Federal programs.*
- *Apportionment of state school moneys.*
- *Publication of laws relating to schools.*
- *Collection and publication of information which reflects continuously the condition and management of the state's public schools.*

Part I

Report
of the
Year
Completed

The Year in Review

By Arthur L. Mallory
Commissioner of Education

The 1978-79 school year was an appropriate finale for the Seventies—a memorable decade in our nation's history and in the development of Missouri's public education system. Several important events and developments of the 1978-79 academic year reflected the influence—and in some ways, the culmination—of major educational trends of the past 10 years.

The 1978-79 school year, for example, saw a record amount of state financial aid distributed to local school districts through the Foundation Program, the primary source of state assistance to local schools. The total appropriation for the Foundation Program was $526,839,692, an increase of $46 million over the previous year. The Foundation Program was revised by the Missouri Legislature in 1977, and the General Assembly has demonstrated its commitment to quality education by approving substantial funding increases for the Foundation Program each year since 1977.

The growth of the state's contribution to financing public education in Missouri parallels a national trend during the 1970s—school finance reform. Appropriations for the Foundation Program have more than doubled during the 70s—in response to rising educational costs, the slow rate of growth in local school districts' revenues and other factors. School finance and the state's role in funding public education became critical issues during 1970s and will remain such during the coming decade.

A significant event during 1978-79 was the first statewide administration of the Basic Essential Skills Test (BEST) to all public school eighth graders, as required by the State Board of Education. Missouri students performed well on this test, the results of which appear in Section II of this book. The BEST represents the impact of the "competency testing movement" which swept the country during the late 1970s. Missouri school districts are using the BEST constructively to assure students' mastery of essential skills and to communicate with parents. Resistance to the BEST largely subsided during 1978-79, and the statewide release of the test scores (during August, 1979) created only short-lived discussion.

The 1978 Regional Educational Conferences, sponsored by the Department of Elementary and Secondary Education, focused public interest and constructive debate on the subject of school discipline—the overriding concern of Americans about their public schools during the 1970s. These 10 regional meetings produced some surprising conclusions and useful information regarding what Missourians think about school discipline problems, their causes, and their solutions. The purposes and findings of these conferences are described in detail on pages 22 and 23.

The 1978-79 school year saw continued growth and strong emphasis on special education for handicapped students. Last year, Missouri's local schools provided special education services to a total of more than 165,000 children, compared with about 79,000 during 1969-70. Missouri's local schools employed more than 7,500 special education teachers during 1978-79, compared with about 2,200 at the beginning of the 1970s.

The 1970s have been a period of phenomenal growth and change in the field of special education, and Missouri has been a consistent leader in providing new and better services to handicapped students. Missouri's full-scale commitment to special education began with the passage of "House Bill 474," the comprehensive state law enacted in 1973. During 1978-79, Missouri was the first state to receive federal approval for its state special education plan, required under Public Law 94-142 (a landmark education law of the 1970s).

Missouri's local school districts have done an outstanding job of

meeting the needs of our hardest-to-serve children and developing new policies and practices to comply with complex new laws and regulations.

There were new developments in vocational education during 1978-79, capping a decade of growth and change in this increasingly important aspect of Missouri's public education system.

The State Board of Education designated four more school districts in the state as area vocational-technical schools. This growth in the number of area schools (to a total of 59) will help meet the growing demand for vocational education in the state. Area vocational schools (which enrolled about 78,000 persons during 1978-79) have grown to become a vital part of the state's vocational education program during the 1970s. Last year's growth indicates that area schools will continue to play an increasingly important role during the decade ahead.

While the efforts of educators and the attention of citizens were often concentrated on particular problems during the past year—problems such as declining enrollment, inflation and gasoline shortages—I believe important progress was made in many areas. The Basic Essential Skills Test has focused valuable attention on essential academic skills and will lead, I'm convinced, to improved achievement by Missouri students. More schools became involved in the Right to Read program sponsored by the Department, concentrating new efforts on improving reading instruction. There was fast-growing interest in the area of writing and renewed recognition of the importance of writing skills for students. With the continuing decline in statewide enrollment, there was increased interest in finding ways to individualize instruction. There was, perhaps for the first time, serious discussion of the possibility and the desirability of reducing average class sizes in schools as one way of helping improve students' acheivement.

Undoubtedly, many challenges await Missouri's public schools during the next decade. I believe these challenges include:

- Working together, each school, each community and every parent should emphasize academic excellence at every level and in every subject. Parents and educators must establish expectations for students which promote excellence and which are intolerant of mediocrity in learning.

There will be growing public demand for schools to demonstrate that all students master basic academic skills. New initiatives related to basic skills are beginning at the federal level, and a fundamental issue during the 1980s will be whether the federal government or local school districts in cooperation with state agencies establish the programs and priorities related to the basics.

As an integral part of emphasizing academic excellence, schools must continue to take care of students with special needs—handicapped students, academically gifted students and others.

- Attracting and retaining quality teachers will be a major challenge during the 1980s as fewer new teachers come into the labor market and as competition from the private sector increases. The education community must work together to improve salaries for teachers and to recruit dedicated young persons to the profession.

There will be a growing need for in-service training to help teachers gain new knowledge and adapt to the changing needs of students and society. It is likely that, as a result of declining enrollment and population shifts, teachers will require additional training so that they may be certified in more than one area. School districts will be required to work more closely with area colleges and universities in order to meet the in-service training needs of teachers most effectively.

Continuing declines in the school-age population will be accompanied by dwindling public support for public education unless schools can broaden their services and base of community support. Toward this end, schools will need to expand services in areas such as adult and community education, dropout prevention and early childhood / parent education. Schools will need to work closely with institutions of higher education and the private sector to define their roles more precisely and to provide those services they are most capable of offering. To foster continued community support for education, schools must provide avenues and opportunities for parents and patrons to be appropriately involved in school operations and policy making.

- Inflation and rising costs for various forms of energy will challenge school people to maintain present programs and services. Energy conservation will be essential. School districts will need to find new and better ways of cooperating, in order to provide academic programs and other services more efficiently and economically.

- A final challenge for public schools during the 1980s will be to encourage positive attitudes toward basic institutions and authority in our society; to emphasize integrity, hard work and productivity; and to emphasize each student's contributions to society at large and a stronger United States of America. It is right and proper for public schools to promote the values and ethics which have made this nation strong and, without which, our nation will suffer intolerably.

I am confident Missouri's public schools will meet these and other challenges as they have done during 1978-79 and throughout the decade of the 70s.

The Condition of Education

An overview of important trends and events affecting Missouri's public schools during 1978-79

The graduating class of 1979 in Missouri's public high schools had 64,163 members—a decrease from the record number of 64,504 graduates in 1978. That statistic illustrates the impact of perhaps the most significant trend in education during the 1970s—declining enrollment.

When the 1970s began, schools were riding the wave crest of the baby boom. During the 1971-72 school year, total public school enrollment peaked in Missouri at 1,087,800 in kindergarten through grade 12. By 1978-79, total statewide enrollment had dropped about 10 percent to 978,264.

A report to the State Board of Education during November 1978 revealed decreasing school-age population in all but 18 of Missouri's 114 counties. The report predicted that the majority of Missouri's school districts will feel the effects of declining enrollment during the coming decade, as statewide enrollment (according to current projections) continues to decline gradually before leveling off at about 885,000 in the mid-to-late 1980s.

The report also emphasized that rising costs will compound the problems associated with declining enrollment for most school districts. The dilemma of declining enrollment/rising costs was a major topic of discussion among educators during 1978-79. School administrators and school board members became more aggressive in trying to inform the public about the problems created by the squeeze of dwindling enrollment and rising costs. These trends, along with the reactions of school districts throughout the state, also were reported and interpreted at greater length by the news media, thus helping to focus widespread attention on declining enrollment and rising costs as two major issues during 1978-79.

Gasoline: Scarce and Expensive

"Superinflation" may be the best way to describe what happened to fuel prices during 1978-79.

As the 1978-79 school year drew to a close, a nationwide fuel shortage developed, and gasoline prices began increasing rapidly. The shortage threatened to curtail bus service in some school districts, but the school year ended—thus reducing schools' demand for fuel—before any serious problems arose.

Gasoline shortages continued throughout the summer of 1979, prompting fears that school districts would be unable to secure adequate supplies of gasoline for their buses when school resumed. As a result, many districts reviewed transportation policies, revised and shortened bus routes and searched harder than ever for ways to save gasoline in their pupil transportation program. School districts even began converting school buses to run on liquefied petroleum gas (propane) which was in plentiful supply and cheaper than gasoline in some parts of the state.

During July 1979 the State Board of Education adopted safety regulations governing the conversion of school buses to propane fuel systems and also suggested several fuel conservation measures for local schools to consider.

By the fall of 1979, fuel supplies were near normal again—except for the price. Statewide, gasoline prices paid by school districts were up sharply—double the cost of 1978 in some cases. For school districts which had already adopted their 1979-80 budgets, the rapid increase in fuel prices caused great concern and forced revisions in budgets and cutbacks in other areas.

The fuel crisis of 1979 accelerated the energy conservation efforts of school districts throughout the state. Many districts began the data collection and reporting activities needed

1978-79 Education Statistics in Brief

Number of Public School Districts	555
Enrollment	
High School Districts	
K-8	642,360
9-12	320,808
Elementary Districts (K-8)	15,096
State Total (K-12)	978,264

AAA	1,590.52
AA	1,740.76
Unclassified	1,230.68
Total / All Districts	1,633.97
Average School Tax Levies	
High School Districts	$4.11
Elementary Districts	3.73
Total / All Districts	4.04

to participate in the Missouri School Energy Conservation Service (MSECS), a program provided by the Department under contract with the Missouri Department of Natural Resources. The energy audits and technical studies conducted through the MSECS program may culminate in some schools receiving federal funds for energy conservation projects (insulation, building renovation, new equipment, etc.) authorized by the National Energy Conservation Policy Act of 1978.

Right to Read Emphasizes New Ideas, Successful Approaches

Ten school districts (and seven alternates) were selected by the Department to participate in an intensive "Right to Read" program during 1978-79. The Department has been involved in federally funded Right to Read activities since 1975 with the emphasis on statewide reading improvement activities. The direct involvement of local districts added a new dimension to the program and sparked new interest in ways to improve reading instruction.

The school districts selected for the program (on the basis of applications) were: St. Charles, Hannibal, King City, Clinton, Blue Springs, Mt. Vernon, North Callaway County R-I, Tina-Avalon, Mountain Grove and Malden. The Right to Read program began during the summer of 1979 with a week-long institute for staff members of the participating schools. During the institute, teachers and principals studied topics such as reading in content areas, selecting

reading materials, the role of the principal in reading programs and using the Statewide Testing Program as part of the reading program.

Department staff members continued to provide workshops, materials and technical assistance to the Right to Read schools throughout the school year. The selected schools were located in every region of the state, thereby making it possible for representatives from other school districts to visit a nearby Right to Read school and pick up information and ideas.

During January, 1979, 20 more school districts were selected by the Department to take part in Right to Read activities during 1979-80.

The BEST Arrives

Between March 1 and March 15, 1979, most eighth graders in Missouri public schools took the Basic Essential Skills Test (BEST) for the first time under State Board of Education mandate. Nearly 70,000 students in all took the three-part test of basic skills (reading/langauge arts, math, and government/economics). During 1978, nearly 60,000 students had taken a "dry run" of the BEST when school districts used the test on a voluntary basis.

During 1979, overall performance of eighth graders improved about five points over the previous year. Complete results from the test appear in Section II of this report.

While some schools and educational groups have publicly opposed the BEST, schools administered the test smoothly during 1979 and have, for the most part, learned to live with it and take advantage of it. Before the test was administered, many educators had expressed the fear that the test results (published by the Department of Education and available on a district-by-district basis) would be used to make unfavorable comparisons of school districts. District-by-district tallies of BEST scores did appear in a few newspapers across the state, but attention to the results was short-lived. Many districts, expecting controversy instead received favorable media coverage as a result of their BEST data. Teachers and school officials also found the individual test reports provided for every student a good tool for communicating with parents about their children's academic progress.

If results from the BEST decline significantly in the future, it is likely that debate over the test will flare up again. Another question which may arise is whether passage of the BEST should be required for high school graduation. (It is not now required by the State Board of Education; local school boards have the option of making passage of the test a graduation requirement.) During 1978-79, however, the BEST arrived with little of the anticipated fanfare and became part of "business as usual" in Missouri's schools.

Classification Progress Continues

Classification ratings for Missouri's public school districts during 1978-79—including improved ratings for 30 districts—were approved by the State Board of Education during its May meeting.

The classification ratings, recommended to the Board by the Department, are based on evaluations conducted by the Department throughout the past school year.

A summary of the classification report approved by the Board shows:

- Twenty high school districts moved from Accredited to AA status.
- Two high school districts moved from AA to AAA standing.
- One high school district dropped from AAA to AA; one dropped from AA to Accredited; and two dropped from Accredited to Unclassified status.
- Five elementary districts improved their ratings from Accredited to AA; three elementary districts improved from Unclassified to AA status.
- Four elementary districts dropped from Accredited to Unclassified status.

The Accredited level is a transitional category which replaced the A classification in 1977, according to the implementation schedule for current classification standards (adopted by the State Board of Education in 1973). The Accredited status also is being phased out, however, and after July 1, 1980, there will be only three classification categories—AAA, AA and Unclassified.

Enrollment figures included in the report show that 98.52 percent of Missouri's public school students were enrolled in high school districts; 1.48 percent attended elementary districts. During 1978-79, 98.49 percent of Missouri's students attended either AAA or AA schools.

With the new ratings approved by the Board, high school districts are now classified as follows: AAA-159; AA-267; Accredited-22; and Unclassified-7. Elementary districts are now classified: AAA-3; AA-35; Accredited-8; and Unclassified-54.

(See page 25, "Priorities of the State Board of Education," for more information about progress under the school classification standards.)

Highlights of 1978-79

The Rev. Jesse L. Jackson (right) addressed a record crowd of Missouri school officials during the 17th Cooperative Conference for School Administrators, held August 7 and 8, 1978, at Jefferson City and sponsored by the Department of Education. Rev. Jackson, national president of PUSH (People United to Save Humanity) has earned a national reputation for his efforts to motivate black students and to improve the quality of education in inner-city schools.

* * *

Homer L. Hall, a high school journalism and sociology teacher in the Kirkwood School District, St. Louis County, was selected during October, 1978, as Missouri's Teacher of the Year for 1978-79. A teacher for 16 years, Hall represented Missouri in the national Teacher of the Year program, sponsored by the Council of Chief State School Officers, Encyclopaedia Brittanica and *Ladies' Home Journal* magazine.

* * *

During 1978-79, three new State Schools for Severely Handicapped were dedicated: Boonslick State School, St. Peters, December 17, 1978; Gateway State School, St. Louis, April 1, 1979; and Mississippi Valley State School, Hannibal, April 29, 1979.

* * *

Teachers for the St. Louis Public Schools went on strike January 16, 1979. The strike, longest in the city's and state's history, lasted 56 days. Settlement of the strike involved a payment of $1.3 million in state funds authorized by Governor Joseph Teasdale and a contribution of $600,000 by St. Louis area businesses.

* * *

The winter of 1979 was another bad one for Missouri's schools. Even Southeast Missouri, unaccustomed to heavy snow, suffered one of the winter's worst storms. Some districts closed for more than 25 days because of severe weather.

* * *

During February, 1979, the State Board of Education approved revisions in state regulations concerning state-assisted programs for gifted students. The changes were prompted by fast-growing interest across the state in providing such programs. During 1978-79, 39 school districts offered state-assisted programs for gifted students and received a total of $1.9 million in state aid.

* * *

Also during its February, 1979, meeting, the State Board of Education adopted a resolution encouraging schools to join the observance of 1979 as "International Year of the Child."

* * *

Nearly 150 educators, public health officials, representatives of medical professions and volunteer health organizations attended a conference at Jefferson City, March 23 and 24, 1979. Sponsored by the Department and other agencies, the Statewide Conference on Comprehensive School Health Instruction was held to identify the top health needs of children and growth and ways of meeting those needs within regular school programs. Recommendations from the conference were published in *Missouri Schools*, May 1979.

* * *

April 19, 1979: The State Board of Education adopted a resolution opposing formation of a federal department of education. "There is no assurance that a federal department of education will contribute to any significant improvements in education throughout the country. A federal department of education could, however, become an even bigger, more deeply rooted bureaucracy, imposing an even bigger burden on local schools," said Commissioner of Education Arthur L. Mallory.

* * *

A total of $5.2 million in state matching funds was approved by the General Assembly in 1979 to assist five school districts with construction of new area vocational-technical schools. The school districts are: St. Joseph, Platte County R-III (Platte City), South Harrison R-II (Bethany), Carrollton R-VII, and Camdenton R-III. The General Assembly also reappropriated $1.6 million to assist in construction of a new area vocational facility in the Special School District of St. Louis County.

* * *

Missouri students taking the Scholastic Aptitude Test (SAT) during 1979 scored lower than students the year before. Missouri students dropped to 461 from 465 on the verbal portion of the test and to 504 from 506 on the math portion of the test. State scores were still above the national levels of 427 (verbal) and 467 (math).

Education-Related Legislation Enacted During 1978-79

During 1978-79, the Missouri General Assembly passed more than 30 bills which, directly or indirectly, affect education in the state. Five of these bills are particularly significant.

Under House Bill 280, county boards of education were abolished and the few remaining functions of county boards have been turned over to other authorities. County courts, councils or legislatures are now charged with preparing plans for school district reorganization, assigning unorganized territory and filling vacancies on school boards when more than two vacancies exist. The presiding judge will break tie votes at a local school board's request, and the Commissioner of Education or his designee will hear requests for assignment of pupils to more accessible school districts.

House Bill 343 modified Missouri's handicapped children law (HB 474) by compressing the time provided for parents to request administrative review of a child's case (from 30 days to 10 days) and provides an appeal process for decisions made by local boards of education. The new appeal process also provides a mechanism for selecting a three-member panel to hear disputed cases. Educators feel these changes will better ensure that special education students receive proper services as quickly as possible.

As school bus service has expanded in Missouri in recent years, transportation laws have been modified frequently. In 1978-79 the General Assembly further modified these laws with House Bill 300, which provides local school boards more flexibility in their transportation programs. The law permits school boards to authorize the busing of children living less than one mile from school, if no tax increase is necessary to pay for the service. If it is necessary to increase taxes to pay for this service, the voters of the district must approve the increase by a two-thirds majority vote. The bill also provides that the board may contract with individual parents living less than one mile from school to transport their children, with the parents paying the cost.

The General Assembly also passed Senate Bill 318, giving boards of elementary school districts more control over their transportation programs. Under the bill, elementary districts may designate one or more accredited high schools in the county or an adjoining county to which they will pay transportation costs for their students. Elementary districts will still be responsible for tuition to the approved high school of the student's choice in the county of residence or an adjacent county.

After several years of discussing reassessment of real property, the legislature passed Senate Bill 247 mandating reassessment in all Missouri counties by December 31, 1983. Each county's reassessment plan must be approved by the State Tax Commission. The cost of reassessment will be shared by the state, the county and other taxing jurisdictions in the county. After reassessment, tax rates will be rolled back to produce substantially the same amount of tax revenue as produced the previous year, plus a percentage increase based on a formula set forth in the statutes. Revised tax rates may then be raised by the same voter majority as required before rollback. Senate Bill 247 also improves the "circuit-breaker" tax relief program for senior citizens by raising the eligible income ceiling from $7,500 to $8,500 yearly. Although this change does not affect local school district revenues directly (since the "circuit breaker" is a tax credit on state income taxes), local school districts may benefit by being able to gain greater support for school taxes from senior citizens who received more income protection from the new circuit breaker provisions.

Progress Report 1978-79: Priorities of the State Board of Education

The Missouri State Board of Education, in providing leadership to the public schools of the state, named 22 topics to receive special attention during the 1978-79 school year. The Department of Elementary and Secondary Education, the administrative arm of the State Board, supervises programs and activities in these priority areas. This report summarizes activities of the Department and local school districts relating to the Board's priorities.

The priorities selected by the Board are listed in the accompanying box. A description of the programs and activities for each priority follows.

Priorities for 1978-79

Education Quality
1. Basic Skills
2. Education of the Academically Talented
3. Citizenship Education: Rights and Responsibilities of Citizenship in a Free Society
4. Teaching Math and Science at the Elementary Level
5. Teacher Preparation
6. Economic Education
7. Early Childhood and Parent Education

Accountability
1. Assessment and Statewide Testing (BEST) Utilization
2. Missouri Uniform Financial Accounting System
3. Classification Study
4. School Management Review

Urban Education
1. Prevention of Crime, Violence and Vandalism in Schools
2. Student Motivation and Discipline
3. Equal Access to Quality Education
4. Research: Absenteeism and Dropouts

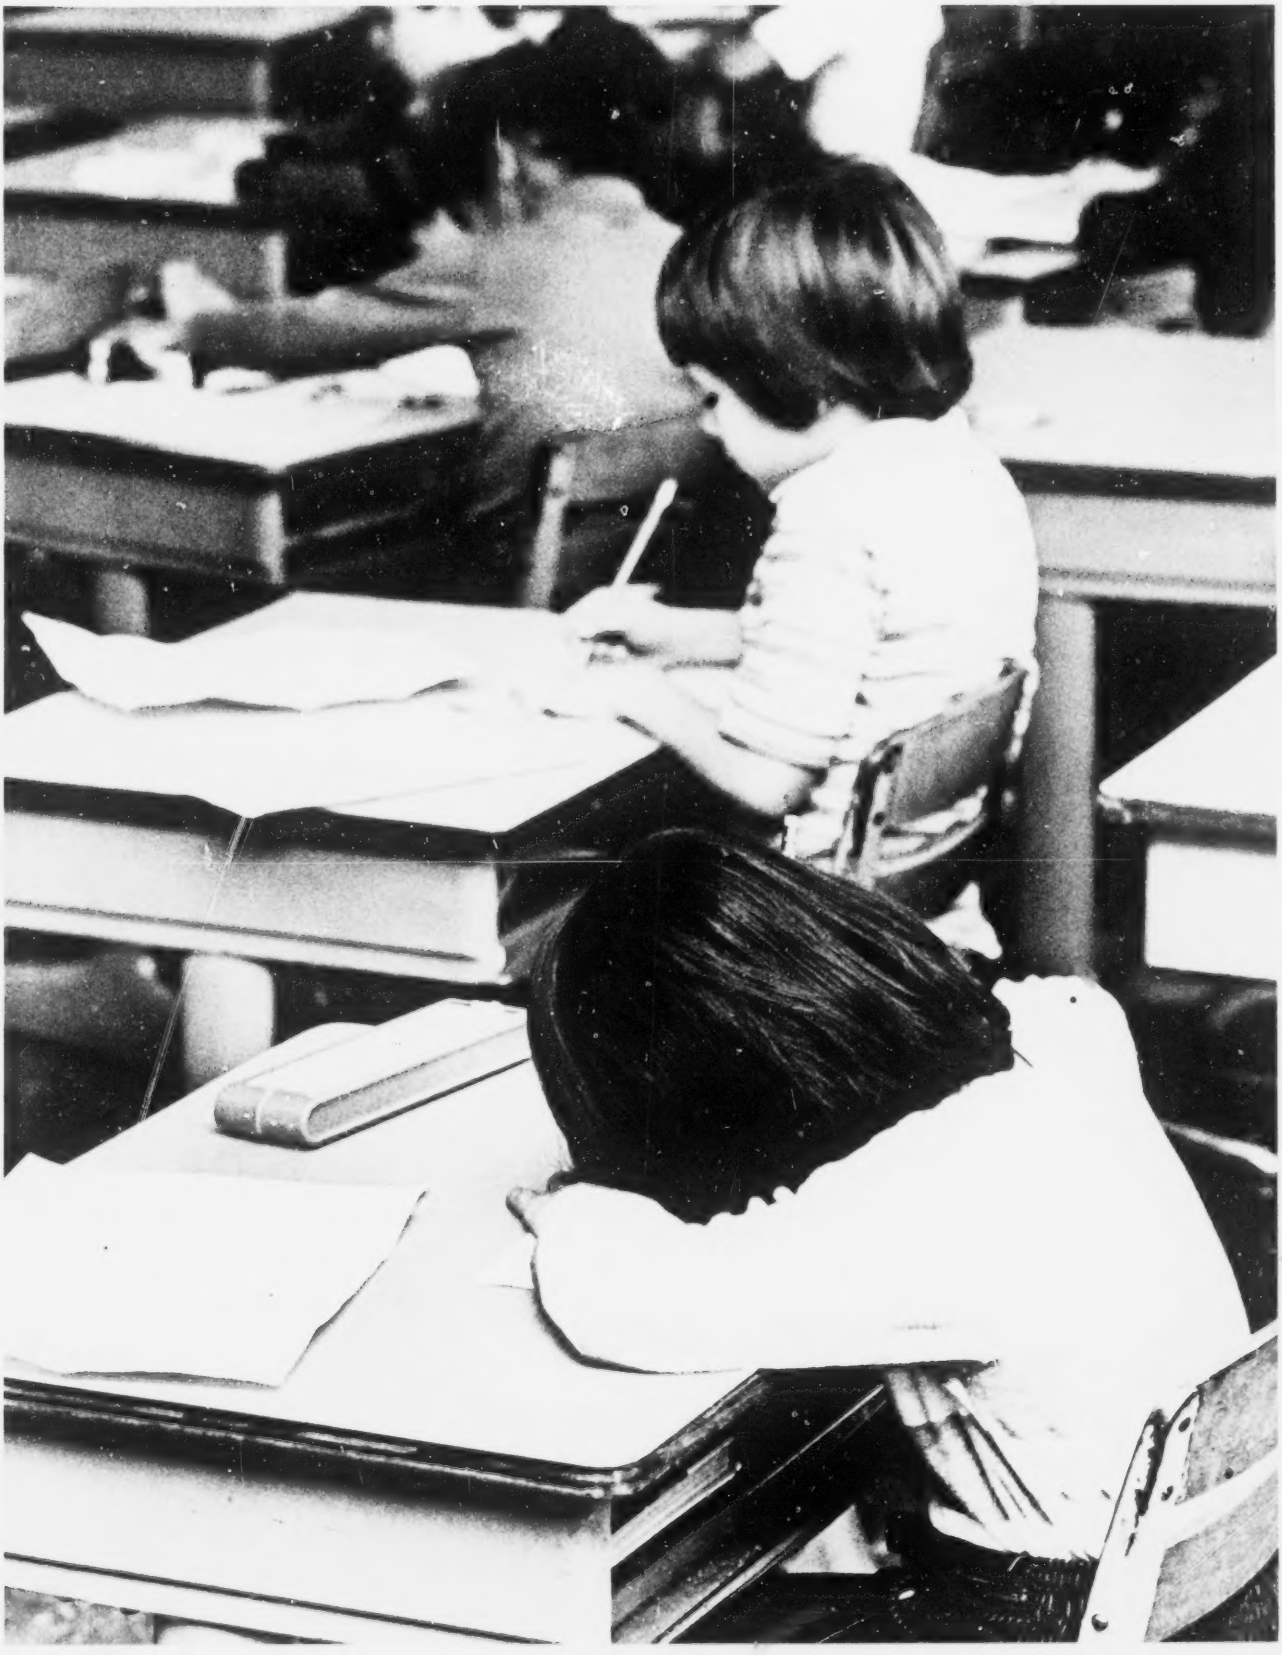
Career and Adult Education
1. Task Force 1990
2. Community Education
3. MOTIS-VEDS Revision

Educational Administration
1. Energy Conservation
2. Foundation Program Evaluation and Review
3. Reduction in Paperwork

Vocational Rehabilitation
1. Increase Number of Severely Disabled Rehabilitated

Basic Skills—Language arts (reading, writing, spelling, speaking, and listening), mathematics, and social studies are considered the basic subjects in Missouri public schools. When basic knowledge and concepts in these areas have not been mastered, all of the students' education tends to suffer. Therefore, these areas are considered the major priority of the State Board of Education. The Department of Elementary and Secondary Education concentrates on activities and services to help local school districts improve instruction in these areas.

Reading is the most basic of the basic skills areas. The ability to read and to comprehend what has been read is essential to a student's academic success. The Department provides a publication entitled *Basic Reading Skills for Missouri Students* to all public schools. In-service workshops aid local schools in using the publication and improving their basic reading program. The Department also makes available to public schools the following publications: *The Mis-*



souri Basic Word List and Tutoring Suggestions, Handbook for Volunteers in Reading Programs, Teacher's Handbook for Volunteers in Reading Programs, and *25 Ways Parents Can Help With Reading.* In addition, two series of audio-cassette tapes and accompanying materials have been developed to provide in-service information for teachers on reading comprehension and teaching reading in the content areas.

In response to concerns expressed by citizens and educators about the teaching of writing skills, the Department developed *Basic Writing Skills for Missouri Schools K-12* during the 1978-79 school year. This publication contains suggested teaching activities and objectives that all teachers—not just English teachers—may use at all grade levels. Many Missouri educators contributed to this publication. The *Guide* focuses on the process of writing and stresses the philosophy that "students learn to write by writing."

The Department has available *Basic Mathematics Skills for Missouri Students* to assist school districts with improving basic math instruction. The guide suggests skills to be mastered by students in kindergarten through grade 8 and includes an individual student record system to assist teachers in recording math skills mastered by students.

The Department is developing a new social studies guide to assist school districts in reviewing and improving their social studies programs from kindergarten through grade 12. During 1978-79, five subcommittees worked with the Department in the development of the guide to ensure broad involvement of local school personnel. This guide will be completed during the 1979-80 school year.

Education for the Academically Talented—While all school districts serve academically superior students in their elementary and secondary schools, an increasing number of districts are interested in developing special programs to better serve gifted students. These services go beyond those ordinarily provided in regular programs for superior students and can be provided through state-assisted programs for gifted students. Whereas 24 school districts offered such state-assisted programs during the 1977-78 school year, 39 districts operated such programs during 1978-79; 60 districts submitted project proposals for 1979-80.

With this increased interest in special services for gifted students, the Department of Elementary and Secondary Education assigned the gifted program to the Division of Instruction. The director of gifted programs provides consultative and technical assistance to school districts requesting help to develop programs for gifted students.

Six regional workshops were held during 1978-79 to discuss the *Administrative Manual and Guidelines for State-Assisted Programs for Gifted Students.* During April, a conference on gifted education was jointly sponsored by the Department and the Missouri Facilitator Center to present successful programs for serving gifted students. This area of education is expanding and growing and will continue to be important in the future.

Citizenship Education—Citizenship education—or instruction directed at helping students become more effective as individuals and as participants in society—is an important aspect of education in a democratic society. The Department and most school districts focus citizenship education efforts in the social studies curriculum. The new social studies guide discussed under "Basic Skills" emphasizes and will be used to strengthen citizenship education, as well as the general area of social studies throughout the elementary and secondary curriculum.

For several years the Department has worked closely with The Missouri Bar in a special law-related education program, "Rights and Responsibilities of Citizenship in a Free Society." In this program local attorneys serve as resource persons, assisting classroom teachers in presenting legal topics to students. The Missouri Bar maintains and operates an audiovisual library and materials center which provides law-related resources to local school districts upon request. The Bar also distributes a newsletter and a curriculum guide, developed cooperatively with the Department, to Missouri educators upon request. During 1978-79, more than 20 workshops to implement or strengthen law-related instruction were held in various locations throughout the state at the request of local school districts.

Teaching Math and Science at the Elementary Level—The Department's publication, *Basic Mathematics Skills for Missouri Students,* is directed at improving math instruction for elementary students. The guide suggests skills to be mastered in each grade and includes an individual student recording system for teachers. The Department also conducts in-service workshops on math instruction for local schools upon request.

The elementary science curriculum has taken on new dimensions with expanded interest in environmental and energy education. In 1978-79, the Department cooperated with the Department of Conservation and the Department of Natural Resources in making schools aware of environmental and energy education materials available through them. These resources included written materials and consultation services which help school districts keep their science curriculums relevant and up-to-date.

Teacher Preparation—The Department continued its involvement and interest in the area of teacher preparation during 1978-79. Shortly after the end of the 1978-79 school year, for example, the State Board of Education approved (in July) substantial revisions in secondary teacher certification requirements. These stan-

Delmar A. Cobble, Jackson, served as president of the State Board of Education during 1978-79.

dards, which become effective September 1, 1984, affect the basic professional education requirements for all prospective high school teachers and modify the academic requirements for particular subject areas such as math, science, English, home economics, etc.

The Department has involved all levels of the education profession in its studies and revisions of certification standards. The Teacher Education and Certification Advisory Committee (and its specialized subcommittees) gives classroom teachers in Missouri a strong voice in recommending certification policies to the State Board of Education. The Educational Conference—representing presidents and deans of Missouri's public and private teacher-training institutions—also has participated in the Department's continuing efforts to review and update teacher training and certification programs.

A noteworthy activity during 1978-79 was the development of recommended Teacher Education Program Guidelines. Prepared in draft form during 1978-79, these guidelines will be used to evaluate teacher education programs in Missouri colleges and universities. The state's institutions of higher education are taking part in the development of these guidelines which will be useful to colleges and universities with teacher education programs approved by the National Council for Accreditation of Teacher Education (NCATE) as well as by schools not approved by NCATE.

Economic Education—The Department works closely with the Missouri Council on Economic Education to provide materials and workshops to local schools on economic education. By the end of the 1978-79 school year, the Council had established a network of five centers for economic education located in St. Louis, Kansas City, Springfield, Cape Girardeau, and Columbia. Each center contains a resource library and has consultants available to assist schools in reviewing and improving their economic education programs.

The Department has also participated with the Agency for Instructional Television to strengthen economic education in producing a series of fifteen 20-minute videotape programs on economic education. The series, "Trade Offs," for grades 4-8, helps schools develop basic economic concepts for this age group. Each program has accompanying support materials and teacher guides. These programs are available to school districts free of charge, and the Department provided workshops to help local schools implement the series.

Early Childhood and Parent Education—Educators, parents and other concerned adults are, more and more, recognizing the importance of early childhood and parent education. The Department has continued to assist local school districts in developing programs in their districts. During the 1978-79 school year, 108 school districts operated 173 early childhood programs serving pre-kindergarten age children and their parents.

During 1978-79, the early childhood section of the Department developed an alternate form for the Missouri Kindergarten Inventory of Developmental Skills (K.I.D.S.) to include items for use with children as young as four years of age. This screening battery was developed in response to requests from Missouri schools for a comprehensive assessment measure to use at or before kindergarten entrance.

The Department's early childhood section also provided school districts with the publication *Planning and Funding Early Childhood & Parenting Education Programs* to assist educators in developing or expanding services for young children and their parents. The Department's general interest booklet, *How Does Your Child Grow and Learn*, was reprinted and widely distributed to parents as well as educators.

Assessment and Statewide Testing (BEST) Utilization—The Missouri Testing and Assessment Program is a combination of tests designed to meet the minimal and varied testing needs of Missouri's public school districts and students. The tests in the program have been constructed to provide the type of data most useful to teachers, parents and students at various grade levels. Some of the tests produce comparative data, while others provide only information on individual students.

In order to help school districts use test data most effectively, the Department, upon request, held workshops for teachers on test utilization. Test analysis materials on the fourth and sixth grade tests were prepared to assist teachers in interpreting these tests. The Department also prepared and distributed a guide for administering and analyzing the Basic Essential Skills Test (BEST). In addition, the Department's 10 district supervisors gathered information about local school districts' test utilization practices to share with other school districts.

During 1978-79 the Missouri Testing and Assessment Program included nine test instruments, described below in more detail. Results from these tests are listed in Section II of this Report. Also during 1978-79, three more developmental criterion-referenced tests—for grades 2, 3

(Continued on Page 24)

Missouri's Regional Conferences Reflect National Concern About School Discipline

"School Discipline: An Atmosphere for Learning" was the theme of 10 Regional Educational Conferences sponsored by the Department during the fall of 1978. These conferences reflected the concern of the State Board of Education and one of its priorities for the year—"student motivation and discipline." The conferences themselves and the opinions expressed by conference participants prompted great interest by citizens, educators and the news media.

A record number of about 3,500 students, parents, citizens, teachers, school administrators and school board members attended the day-long Regional Conferences, held at 10 locations across the state. The conferences provided a forum for Missouri citizens and educators to share ideas and concerns about one of the most-talked-about issues in education during the 1970s.

Less than one month before the conferences, the Tenth Annual Gallup Poll of the Public's Attitudes Toward Public Schools was released. That nationwide survey showed Americans consider "lack of discipline" to be the number one problem confronting the public schools today. At the Regional Conferences, Missourians echoed the findings of the Gallup Poll.

During the Conferences, four major topics related to discipline in school were discussed: (1) legal aspects of school discipline; (2) the school's role in creating good discipline; (3) the role of parents and the community; (4) the role of students. These themes provided some structure for small-group discussions—the biggest part of each conference. Each of these groups included students, parents and educators so that all points of view would be represented. At the end of the sessions, participants were asked to respond to an

"opinionnaire" about school discipline; 2,400 persons responded.

The survey asked for opinions on many areas of school discipline, including the seriousness of such problems as smoking, skipping class, and crime in the schools. The results of the survey give some insight into Missourian's opinions. In answer to the first question, "Do you believe that lack of discipline is the number one problem facing the public schools today (as the Gallup Poll reports)?" a majority (53%) of the respondents agreed; 35 percent disagreed and 11 percent had no opinion.

Perhaps the most surprising conclusion emerging from the opinionnaire was the degree of consensus among all participants. The Department analyzed the responses of each group—students, parents, teachers, administrators, board members and others. Generally the responses of each of these groups were the same for all items included in the questionnaire.

For example, the second item on the questionnaire asked participants to select what they consider to be the four most serious discipline problems in the public schools. The most frequent responses to this question, overall, were:

- Disruptive classroom behavior (80%)
- Students' disrespect for authority (78%)
- Students' apathy for learning (77%)
- Absenteeism (46%)

These four problems were selected, in the same order, by teachers, administrators, school board members and parents. Students responded almost identically, but selected "class cutting, tardiness," rather than absenteeism, as the fourth biggest problem.

The third item on the opinionnaire asked participants to name what they consider to be the four major causes of school discipline problems. Here, the various groups agreed completely on the ranking of the top four causes. The overall response to this question was:

- Lack of parental knowledge and concern (81%)
- Lack of student motivation (75%)
- General permissiveness of society (74%)
- Lack of teacher ability to manage the classroom (49%)

Another finding of the Regional Conference survey is perhaps contrary to what might have been expected: Generally, there was little difference in opinion based on the size of the school districts. Thus, participants at each conference identified the same major problems and causes associated with school discipline, regardless of where they live in the state or the size of their school district.

The bulk of the survey consisted of a series of questions on various aspects of discipline and the roles which different groups play in promoting positive discipline. From the response to these questions, it appears that students, parents and educators strongly agree about some basic issues and practices related to school districts' discipline policies and procedures:

- 96% agreed that school districts should involve the entire "school family"—board members, administrators, teachers, parents and students—in identifying the kind of student behavior that will be required, allowed, encouraged and forbidden.
- 92% agreed that schools should develop in writing policies and standards of conduct and provide them for school personnel, all students and every home.
- 97% agreed that school officials should communicate directly with parents when a student is involved in a serious discipline matter.
- 91% agreed that parents have a responsibility to determine all of the facts related to disciplinary action against their children before criticizing the school's action.

Other responses indicate Missourians believe that the quality of school discipline is largely determined by the attitudes and values of students and parents—not by laws or regulations:

- 73% agreed that parents should be held responsible for their children's attendance, motivation and behavior in school.
- 78% agreed that students have a personal responsibility to develop self-discipline and motivation.
- 47% agreed and 37% disagreed that the State Board of Education should suggest models and guidelines for school districts to follow in developing discipline standards and policies.
- 45% agreed and 40% disagreed that the State Board of Education should not involve itself in local school discipline problems.
- 24% agreed and 58% disagreed that the General Assembly should enact laws related to school discipline.
- 85% agreed that schools should provide training for teachers and administrators in discipline and management techniques.
- 71% agreed that the State Board of Education should provide technical assistance and training for school district personnel.

The Department of Education has acted on these opinions and recommendations to assist local schools in their efforts to define and enforce "good discipline."

(Continued from Page 21)
and 5—were developed by the Department and pilot-tested for use during 1979-80 and subsequent years.

Kindergarten

The Missouri Kindergarten Inventory of Developmental Skills (K.I.D.S.), developed at the request of schools, is a comprehensive measure of a child's skill development that can be administered at or shortly before entrance into kindergarten. The test was given to 29,612 children during the 1978-79 school year.

First Grade

The Cognitive Abilities Test checks the child's general scholastic aptitude; the Letters and Sounds Subtest assesses the child's understanding of letters and sounds development. This test may be used to identify children who are likely to have reading problems. The test was given to 21,729 children during the 1978-79 school year.

Fourth Grade

This criterion-referenced test in reading and mathematics is developmental, with objectives which describe the basic subject matter taught in fourth grade. The test was given to 27,009 students during the 1978-79 school year.

Sixth Grade

This is a combined criterion- and norm-referenced test which measures student performance in reading and mathematics. The norm-referenced section tests those items usually taught in the sixth grade, while the criterion-referenced portion tests everyday applications of reading and mathematics. The test was given to 43,605 students during the 1978-79 school year.

Eighth Grade

The Basic Essential Skills Test (BEST) was developed to evaluate Missouri students' performance in the application of basic skills to everyday situations. The test is divided into three subtests—reading/language arts, mathematics, and government/economics. The BEST was provided for school districts to use on a voluntary basis during the spring of 1978. By a ruling of the State Board of Education, it was required of all eighth-grade students in the spring of 1979. Students failing any subtest must retake that subtest each spring until they pass or until they complete the twelfth grade. Handicapped students may be exempted or given the test in a modified manner when necessary and specified in their Individualized Education Plan (IEP). The test was given to 74,865 students during the 1978-79 school year.

Ninth Grade

The Test of Academic Progress (TAP) measures achievement in six areas—social studies, mathematics, reading, composition, literature and science. It is used in planning the educational program of students in the areas required for graduation by the State Board of Education. The test was given to 17,825 students during the 1978-79 school year.

Twelfth Grade

The Test of Academic Progress (TAP) evaluates student achievement in the areas of communication skills, mathematics, science and social studies. It is similar to the one administered to ninth graders and can help local school administrators monitor achievement outcomes in the six subtest areas. The test was given to 4,646 students during the 1978-79 school year.

Sixth Grade Assessment

The Sixth Grade Assessment Program enables school personnel to look at the broad aspects of the school program, trends in student achievement, and the educational accomplishments or need for improvement in identified goal areas. The assessment measures learning objectives in 16 areas selected by Missouri educators. The assessment is used by local school staff and local boards of education as an aid in determining instructional needs and allocating instructional resources. The test was given to 15,993 students during the 1978-79 school year.

Twelfth Grade Assessment

The Twelfth Grade Assessment Program helps schools and the state evaluate the overall educational program. Similar to the one administered in sixth grade, it measures learning objectives in 17 areas. The test was given to 18,868 students during the 1978-79 school year.

Missouri Uniform Financial Accounting System—To help schools conform with generally accepted accounting principles and to obtain audit opinions with no qualifications, the revised financial accounting system has been made available to school districts throughout the state. By implementing the system, which is based on double entry bookkeeping, districts can upgrade their accounting procedures and more easily complete required reporting forms.

The Annual Secretary of the Board Report, which is the basic annual financial statement of Missouri's schools, will be revised in 1980-81 to a "cost accounting" format for collecting information on programs such as regular instruction, special education and vocational education. The Report can be completed by school districts using either a cash accounting or a double entry system, depending upon the decision of the local school board. Districts adopting a double entry accrual system, however, should find financial information more timely and accurate to use in planning, budget preparation, and program cost evaluation.

Whereas five school districts used the new system in 1976-77, about 141 districts had adopted it in 1978-79.

During the year, school superintendents, bookkeepers and business managers from each of the 10 supervisory areas have attended training sessions conducted by Department staff on the new accounting system.

Various universities throughout the state have offered specialized courses for school personnel in accounting and bookkeeping, and the Missouri Association of School Business Officials conducted three intensive five-day institutes—two in the St. Louis metropolitan area and one in the Kansas City area.

Classification Study—The Department of Education first established classification standards for school districts in 1950 to comply with state law. Current classification standards, adopted by the State Board of Education in 1973, are voluntary standards for school districts and describe programs and services which are available to students in public school districts. The standards are minimal requirements which help assure each student's access to at least some minimal educational programs and services. As planned by the State Board in 1973, the classification with the least requirements (A or Accredited) will be phased out June 30, 1980. Since 1973, many districts have been improving their programs to meet "AA" or "AAA" requirements.

In 1972-73, there were 99 districts classified "AA" and 221 classified "A." In 1978-79, 267 districts rated "AA" and 22 rated "A." Over 100,000 Missouri students now attend schools with "AA" programs who previously had available only the more limited "A" programs.

To receive this higher classification, districts have added to their elementary curriculum courses in music and art taught or supervised by subject specialists. Programs for handicapped students have been added or enlarged. Libraries and guidance services, both at the elementary and secondary levels, have been added or improved. At the high school level, courses such as trade and industrial programs, advanced science and art courses were added to make the curriculum more diversified. Because of the classification system, 95 percent of Missouri students now benefit from expanded programs.

School Management Review—The Department established the School Management Review to help school administrators evaluate and improve administrative and business practices. A "self-study" manual, developed as a guide for local evaluation of existing policy and practice, has been mailed to every school district and is currently available upon request.

A management review can include a local study followed by an evaluation by selected educators from other school districts and the Department. However, since many boards do not want to invest the time and expense involved in this process, the two studies requested during 1978-79 involved a visiting Department committee reviewing specific areas and reporting its findings and recommendations to the local board of education. Both studies were limited to specific management areas and follow-up indicated that the recommendations that were made have been adopted.

Prevention of Crime, Violence and Vandalism in Schools—Many schools, especially in urban-metropolitan areas, are increasingly confronted with problems from vandalism and crime on school property. In order to help schools deal with these problems, the Department sponsored five workshops on school security and discipline during 1978-79. The workshops, held in the St. Louis, Kansas City and Warrensburg regions, were conducted by the Institute for the Reduction of Crime under a contract with the Department.

The following topics were covered at the workshops: identifying various school security resources, understanding vandalism, examples of school security programs, methods of preventing and handling school security incidents, and school discipline. The workshops offered possible solutions to particular problems presented by various school officials. The Department is continuing to monitor the success of the suggested solutions in order to help other districts with similar problems.

Student Motivation and Discipline—Workshops conducted by the Department's Division of Urban and Teacher Education for urban/metropolitan school districts focused on the topics of student motivation and discipline. These workshops involve teachers, administrators and school

New Board Members Appointed

Irving A. Williamson and Jimmy Robertson were appointed to the Missouri State Board of Education by Governor Joseph P. Teasdale during 1978-79.

Williamson, a retired St. Louis newspaperman, was appointed to the Board in July, 1978, to complete an unexpired term; he will serve until 1980. Executive editor of the *St. Louis Sentinel* from 1971 to 1976, Williamson had previously served for more than 10 years as general manager and editor of the *St. Louis Mirror*, and for 15 years as advertising manager of the *St. Louis Argus*. Williamson graduated from Ohio State University School of Journalism in 1933.

At the time of Williamson's appointment, Gov. Teasdale also reappointed Grover A. Gamm to the Board. A farmer and businessman from northeast Missouri, Gamm had been filling an unexpired term since 1977 and was reappointed for a full eight-year term.

Jimmy Robertson, appointed to the Board in January, 1979, to serve until 1986, is co-owner of Leo Robertson Tire and Motor Supply Company, St. Joseph. He is also a director of Ameribanc, Inc., and Seneca Bancshares. He has been active for the past five years on the board of the St. Joseph hospital.

Robertson served on the St. Joseph Board of Education from 1967 to 1976. He was president of that Board from 1974 to 1976 and was chairman of its finance and maintenance committees.

patrons. Human relations skills, successful discipline practices and behavior modification techniques were among the topics covered in these workshops.

Ten Regional Educational Conferences sponsored by the Department during the fall of 1978 also concentrated on the topics of student motivation and discipline. The theme of these conferences was "School Discipline: An Atmosphere for Learning." Held at 10 locations throughout the state, the conferences brought together citizens and educators for useful discussions about what many Americans consider to be the biggest problem in public schools—lack of discipline. The conferences provided useful information about what Missourians believe are the most serious discipline-related problems in schools today. Conference participants also discussed the causes of school discipline problems and potential solutions. (See pages 22, for a summary of the results of the Regional Conferences.)

The Department also initiated two Juvenile Justice Task Force projects in the Normandy and Hazelwood districts, bringing together representatives from school districts, police departments and juvenile courts to work on mutual problems. These projects have established a communications network and reporting system for the three institutions. The projects deal with such areas as discipline problems, truancy, child abuse and delinquency—with the emphasis on prevention of such problems.

Equal Access to Quality Education—In February, 1979, the State Board of Education accepted and approved an "Equal Educational Opportunities Policy Statement and Guidelines." The technical assistance unit of the Department continued to provide assistance to school districts in desegregation efforts, Title IX compliance, Emergency School Aid Act (ESAA) grant preparation, and compliance and responses to Office of Civil Rights requests. During 1978-79 the technical assistance unit also developed a Title IX (sex discrimination) workbook for local school districts.

Research on Absenteeism and Dropouts—Research is currently being conducted on student absenteeism and dropouts. Major emphasis during 1978-79 was placed on finding reasons why students drop out of school. Understanding trends in this area can provide direction for educational planning during the 1980s to better serve the needs of these students in both rural and metropolitan areas.

Task Force 1990—Even though all segments of education have grown in the last 30 years, the expansion of vocational education has been especially pronounced. Task Force 1990, appointed by the State Board of Education in 1975 to study the future of vocational education in Missouri, made several recommendations in 1976 on continuing goals and activities for vocational education during the 1980s. Department staff are implementing the approximately 100 Task Force recommendations pertaining to 15 vocational educational topics.

During the past year, work began on "articulation" of vocational programs—defining the content and sequence of courses at different grade levels and different institutions, improving cooperation among institutions, and facilitating the transition of students from one level to another. An articulation committee was organized, consisting of representatives from the Department of Elementary and Secondary Education, the Department of Higher Education, the Advisory Council for Vocational Education, and the Division of Corrections. The committee completed a study and made recommendations for improving transition, communication and cooperation among institutions, school systems and communities.

Community Education—The concept of community education involves the school in discovering and meeting the educational needs of the entire community; more than 80 Missouri schools have adopted the concept. With the passage of the Educational Amendments of 1978, which included a new Community School Act, it is anticipated that many more schools will adopt the community education concept.

MOTIS-VEDS Revision—In order to streamline data collection for vocational programs, the Department phased out the Missouri Occupational Training Information System (MOTIS) during 1978-79, and replaced it with the Vocational Education Data System (VEDS). The VEDS system greatly reduces the paperwork required of local schools for reporting their vocational program data.

The statistical phase of VEDS was implemented during 1978-79. Summary information was collected for each class in all approved, reimbursed vocational programs. The Department's data processing unit completed programs to print data for this phase.

Section directors in vocational education, the Missouri Advisory Council on Vocational Education, and school districts received copies of these printouts for planning and reporting. These printouts will also be used to report VEDS data to the National Center for Educational Statistics (NCES), the collecting agency for the federal government.

During 1979-80, the enrollment phase of VEDS will continue, and follow-up information on 1978-79 students will be collected. In 1980-81, the evaluation phase will be developed.

Energy Conservation—Working in conjunction with federal and state energy agencies, the Missouri School Energy Conservation Service (MSECS) was created within the Department's school building services section to assist Missouri schools with energy conservation. This program, operated under a contract with Missouri's Department of Natural Resources, has helped implement the first part of the National Energy Conservation policy Act of 1978, Public Law 95-619.

Preliminary Energy Audits to determine the energy savings potential of school buildings were conducted on a voluntary basis for over 350 buildings in 1978-79; it is expected that more than 1,000 audits will be conducted by the end of 1979. The preliminary energy audit provides important data about energy consumption in school buildings and also makes schools eligible for the other three segments of the Title III program (energy audits, technical assistance and energy conservation measures). School boards are using preliminary audit data to formulate energy management policies for building operation, maintenance, and repair, as well as energy conservation projects.

Continuing concern for effective energy management will encourage Missouri's schools to participate in state and federal energy programs that result in savings of energy resources and tax dollars.

Foundation Program Evaluation and Review—During the 1978-79 school year, about $527 million was distributed to local school districts in Missouri through the Foundation Program. The Foundation Program is the major source of state aid to local districts and provides funds in three categories: exceptional pupil aid (special education), transportation aid, and "basic grants" (through a complex equalization formula).

The 1978-79 school year was the second year in which state funds were distributed on the basis of the formula adopted by the General Assembly in 1977. The 1977 revision of the formula made significant changes in Missouri's school finance system, and the Department closely monitored the effects of the formula's new provisions. It is clear that most Missouri school districts benefited from the revised formula and from the increased appropriation authorized by the General Assembly.

Priorities for 1979-80

The State Board of Education adopted its educational priorities for 1979-80 at its regular meeting in July, 1979. "Basic skills" remains at the top of the Board's list of priorities. Some priorities represent the Board's continuing interest in an area, while others present new areas of emphasis. According to Missouri Commissioner of Education Arthur L. Mallory, "the priorities adopted by the State Board of Education provide a framework for the activities of the Department of Elementary and Secondary Education during the school year."

The priorities for 1979-80 are:

Educational Quality

1. The Basic Skills
2. Education of the Gifted
3. In-Service of Professional Staff
4. Early Childhood and Parent Education

Urban Education

5. Equal Access to Quality Education
6. Research—Absenteeism-Dropouts
7. School / Juvenile Justice Relationship Program

Career and Adult Education

8. Community Involvement and Education
9. Evaluation—Vocational Area School Concept

Educational Administration

10. Energy Conservation
11. Foundation Program Evaluation
12. Efficiency in Paperwork
13. Improved School Management Information System
14. Uniform Financial Accounting System

Vocational Rehabilitation

15. Serve High School Students

Reduction in Paperwork—During 1978-79, the Department continued its efforts to reduce the amount of paperwork which local school officials must complete for various state and federal educational programs.

The Department continued to review all data collection forms used by local school districts to eliminate duplicate requests between programs, to justify the use of the information requested, and to design forms that are understandable and easy to complete. An annual Calendar of Reports was sent to school districts.

The Department also implemented the Basic Educational Data System (BEDS), the Vocational Educational Data System (VEDS), and an expanded Federal Program Payment System. These three systems, designed during the previous year, significantly reduced the amount of data school authorities were required to report during 1978-79.

The Department also works with the Council of Chief State School Officers' Committee on Evaluation and Information Systems (CEIS) to reduce paperwork for local schools. This cooperative effort among states results in the review of all federal educational data forms and surveys. By providing constructive comments and suggestions to the federal data collectors, state level personnel have often stopped or reduced the collection requirements of local school districts.

B. PROGRAMS DATA
a. Special Education Programs
1978-79

Category	Total Number of Children	Total Number of Teachers	Approved Reimbursement
Aides	.....	1,962.00	$ 3,924,000
Homebound	2,973* (372)	.....	693,043
Orthopedic	1,203	87.75	646,893
Deaf and Hard of Hearing	901	107.50	792,490
Blind and Partially Seeing	203	22.25	164,027
Mentally Retarded	22,051	1,578.00	8,724,800
Speech Defective	42,511	800.50	5,901,286
Learning Disabilities	27,108	1,696.75	12,509,768
Behavior Disorders	5,501	482.50	3,556,990
Remedial Reading	70,084** (60,086)	1,506.25	6,478,415
Professional Personnel	.....	923.75	3,695,000
Severely Handicapped	675	73.25	539,999
Pre-School	1,109	85.25	628,463
Totals	174,319	9,325.75	$48,255,174

NOTE: Data for 1978-79 does not include programs for the gifted.

*Represents actual number of students provided homebound/contractural services—second figure represents full-time equivalents based on $800 per each full-time equivalent.

**Incomplete data provided on C & D Reports. The number of students will remain constant in this category.

b. State Schools for Severely Handicapped—Statistical Summary

Attendance Schools	Aggregate Days Membership	Days In Session	A.D.M.	Total Days Attendance	A.D.M.	No. Pupils Transported
64	447,057.5	174	2,569.3	389,387.5	2,237.9	2,786

c. During fiscal 1978, 75 workshops paid 4,134 handicapped workers total wages of $2,878,654 averaging $.59 per hour.

C. MISSOURI SCHOOL TRUST FUNDS

Section 162.790 (5) RSMo., authorizes the State Board of Education to accept grants, gifts, donations, or bequests for the use of the Missouri Schools for the Blind, for the Deaf, and for the Handicapped Children to deposit same in the Schools' Trust fund in the state treasury, or to invest such funds in stocks, bonds, deeds of trust, or any other investment securities in the amounts and in the proportions that the State Board of Education prudently selects.

The act further provides that "moneys in the School for the blind Trust Fund or in the School for the Deaf Trust fund or the School for the Handicapped Children Trust Fund shall not be appropriated for the support of the schools in lieu of general state revenues but shall be appropriated only for the purpose of carrying out the object for which the grant, gift, donation, devise or bequest was made as recommended by the State Board of Education.

a. Missouri School for the Deaf Trust Fund
Balance Sheet June 30, 1979

Assets		
Cash in bank—Boatmen's National Bank of St. Louis		$ (160.46)
Cash in bank—State Treasurer		565.00
Investments:		
Sears Roebuck Acceptance Corp. Variable Interest Note	$22,000.00	
Government Bonds (M/V—$60,078.05)	59,944.75	
Total Investments		81,944.75
Total Assets		$82,349.29
Fund Balance		
Fund Balance		$82,349.29
Total Fund Balance		$82,349.29

b. Missouri School for the Deaf Trust Fund
Analysis of Changes in Fund Balance
July 1, 1978—June 30, 1979

Balance, July 1, 1978		$76,772.28
Add:		
Interest Received	$5,935.28	5,935.28
Less:		
Bank fees	$ 358.27	358.27
Fund Balance, June 30, 1979		$82,349.29

c. Handicapped Children Trust Fund
Balance Sheet
June 30, 1979

Assets		
Cash in bank—Boatmen's National Bank of St. Louis		$ 665.72
Cash in bank—State Treasurer		375.00
Investments:		
Sears Roebuck Acceptance Corp. Variable Interest Note	$14,000.00	
Government Bonds (M/V—$30,068.70)	29,977.90	
Total Investments		43,977.90
Land and Building—Recorded at cost		125.00
Total Assets		$45,143.62
Fund Balance		
Restricted Fund Balance*		$23,650.27
Unrestricted Fund Balance		21,493.35
Total Fund Balance		$45,143.62

*Restricted as follows: $8,587.02—Mapaville State School No. 2, gift from Lillian Kley Estate. $8,402.02—Maple Valley State School, gift from Gladstone Fraternal Order of Police. $6,661.23—B.W. Sheperd State School, gift from Adele S. Holt Estate.

d. Handicapped Children Trust Fund
Analysis of Changes in Fund Balance
July 1, 1978—June 30, 1979

Balance, July 1, 1978		$33,780.45
Add:		
Interest Received	$2,826.15	
Cash Gifts—Estates	8,587.02	11,413.17
Less:		
Bank Fees	$ 50.00	50.00
Fund Balance, June 30, 1979		$45,143.62

e. School for the Blind Trust Fund
Balance Sheet
June 30, 1979

Assets		
Cash in bank—Boatmen's National Bank of St. Louis		$ (3,121.80)
Cash in bank—State Treasurer		40,647.65
Investments:		
Variable Interest Notes (M/V—$536,000)	$536,000.00	
Government Bonds (M/V—$249,827.50)	250,342.63	
Corporate Bonds (M/V—$509,936.37)	565,768.75	
Common Stocks (M/V—$588,865.11)	502,427.39	
Total Investments		1,854,538.77
Furniture and Fixtures		69,051.00
Land and Building—Recorded at cost		224,365.00
Total Assets		$2,185,480.62
Fund Balance		
Restricted Fund Balance*		$ 20,000.00
Unrestricted Fund Balance		2,165,480.62
Total Fund Balance		$2,185,480.62

*Restricted as follows: To assist graduates in starting life on self-supporting Basis. Gift from Eula E. Reynard Estate.

Note: The State Board has set aside $575,000 to be used for dormitory remodeling and relocation of the track and field at the School for the Blind. As of the date of this balance sheet $158,943.40 of this money has been spent.

f. School for the Blind Trust Fund
Analysis of Changes in Fund Balance
July 1, 1978—June 30, 1979

Balance, July 1, 1978		$1,895,136.50
Add:		
Cash Dividends	$ 29,834.75	
Interest Received	105,861.72	
Rental Income	942.87	
Cash Gifts—Estates	151,224.94	
Stock Gifts—Estates	11,659.00	
Gain on Sale—Investments	1,067.32	300,590.60
Less:		
Bank Fees	$ 6,586.17	
Utilities	37.86	
Therapeutic Expense	2,970.64	
Filing Fees	24.43	
Insurance Expense	155.00	
Tax Expense	3.63	
Loss on Sale—Investments	468.75	10,246.48
Fund Balance, June 30, 1979		$2,185,480.62

TABLE 41
VOCATIONAL REHABILITATION

A. Summary Data for Year Ending September 30, 1979

Persons Served and Rehabilitated		Average Cost	
Served	Rehabilitated	Per Case Served	Per Case Rehabilitated
35,307	7,187	$400.38	$1,629.85

B. Services and Cost to the 7,187 Clients Rehabilitated

Services	Number of Clients with Cost	Total Cost[1]
All services*	6,679	$9,381,545
Rehabilitation Facilities	1,608	1,538,927
Social Security Trust Fund	348	585,869
SSI Fund	157	207,376

*Includes clients served other than Rehabilitation Facilities, Trust Fund and Supplemental Security Income Fund.
[1]The costs represent only amounts spent for services purchased by the agency. Some services have been obtained free of charge or may have been paid for, wholly or in part, by other organizations, interested individuals, or by the client himself. Excludes cost of administration, counseling, guidance and placement.

C. Jobs After Rehabilitation

Professional, Technical & Managerial Occupations	854
Clerical and Sales Occupations	944
Service Occupations	1,404
Farming, Fishery, Forestry, & Related Occupations	159
Industrial Occupations:	
Skilled	568
Semi-skilled	187
Unskilled	1,543
Work in Sheltered Workshops	457
Homemakers (own home) and Other Unpaid Family Workers (own family)	1,071
Total	7,187

D. Earnings At Referral and At Closure for 7,187 Rehabilitants

Weekly Earnings at Referral	Number of Rehabilitants	Weekly Earnings at Closure	Number of Rehabilitants
None	6,090	None	1,081
$01-19	123	$01-19	739
$20-39	144	$20-39	327
$40-59	134	$40-59	259
$60-79	120	$60-79	270
$80-99	150	$80-99	287
$100+	426	$100+	4,224

Average weekly earnings at referral ..... $ 13
Average weekly earnings at closure $101
Increase in average weekly earnings $88*

*With an increase in average weekly earnings of $88 for the 7,187 rehabilitants, the total annual increase in earnings would amount to $32,887,712.

E. Disability Determinations Section processed 55,683 cases during fiscal year 1979.

TABLE 42
Testing and Assessment Program Data

A. Summary of 1978-79 BEST Test

BEST	Percent Passing Test
Reading	89.1%
Math	72.8%
Govt./Econ.	77.5%
All Three Subtests	65.2%

Passing Criteria: At least 1 of 3 items correct on each of the 13 objectives and at least 75 percent of the subtest items correct.
Testing Dates: March 1-15, 1979
Total number of eighth graders taking all three Subtests—67,538
Total number of eighth grade students—71,251

B. BEST Reading/Language Arts Subtest

OBJECTIVES (Stated in Abbreviated Form)	% answering correctly at least: 1 of 3	2 of 3 (Mastery)	3 of 3
1. Identification and interpretation of medical terms	99.2	95.5	83.6
2. Identification and interpretation of labels and symbols	99.2	97.9	91.9
3. Interpretation of labels in selection for specific purpose	98.4	93.9	76.5
4. Proper response to commonly used signs	99.3	98.4	92.5
5. Use reference materials and sources to obtain information	98.8	93.9	73.9
6. Recognize main ideas	97.9	92.1	72.5
7. Note purpose of writer	98.4	90.6	71.5
8. Recognize a correctly completed form	98.1	89.9	60.4
9. Interpret business correspondence and contracts	99.1	95.4	73.3
10. Identify information in various sections of a newspaper	99.1	96.3	81.0
11. Interpretation of common documents (menu, ballot)	98.2	93.6	74.7
12. Follow written directions	98.6	97.2	92.0
13. Interpretation of graphic information	98.7	93.0	64.7
Number of students tested:		67,538	
Number of students who mastered all state objectives:		47,464	(70.3%)
Number of students passing this subtest:		60,145	(89.1%)

Locally Administered Objectives	Percent Passing
14. Speak effectively in business and social situations	84.9
15. Write sentences using acceptable grammar, punctuation, and spelling	78.7
16. Use reference materials and sources	83.3
17. Recognize main idea and details of an oral presentation	83.3
18. Complete a business form correctly	85.0
19. Communicate by reading orally	85.8
20. Locate Parts of a newspaper	86.0
21. Follow oral and written directions	84.5
Number of students passing	44,187 (65.4%)

C. BEST Mathematics Subtest

OBJECTIVES (Stated in Abbreviated Form)	% answering correctly at least: 1 of 3	2 of 3 (Mastery)	3 of 3
1. Addition and subtraction of whole numbers	99.2	96.5	77.1
2. Multiplication and division of whole numbers	98.6	95.8	85.9
3. Addition and subtraction of fractions	99.2	97.8	89.3
4. Multiplication and division of fractions	97.1	86.6	55.8
5. Business and consumer transactions	97.0	88.0	64.5
6. Measurement of length, area, and volume	88.3	76.5	47.4
7. Measurement of time and temperature	96.9	87.4	47.7
8. Interpret charts, graphs, tables, maps, scale drawings	97.1	91.9	71.6
9. Ratio and proportion	95.7	88.0	69.1
10. Interpret probability and statistical statements	97.1	90.2	72.9
11. Determine averages	92.8	79.9	58.7
12. Identify horizontal, vertical, parallel, intersecting lines	96.0	87.9	70.3
13. Identify simple plane and solid geometric figures	96.0	85.2	70.8
Number of students tested:		67,538	
Number of students who mastered all state objectives:		34,817	(51.6%)
Number of students passing this subtest:		49,171	(72.8%)

Locally Administered Objectives	Percent Passing	
14. Measure length, volume, weight, time and temperature	83.8	
15. Estimate results and answers to computational problems	81.9	
Number of students passing	52,226	(77.3%)

D. BEST Government/Economics Subtest

OBJECTIVES (Stated in Abbreviated Form)	% answering correctly at least: 1 of 3	2 of 3 (Mastery)	3 of 3
1. Understand terms such as "democracy"	98.2	93.6	76.1
2. Understand process of making, enforcing, interpreting laws	96.0	79.2	36.6
3. Understand rights guaranteed to a citizen	98.1	91.1	61.6
4. Recognize limits on individual rights and freedoms	97.7	89.0	57.9
5. Understand basic responsibilities of citizenship	98.5	96.7	83.5
6. Understand roles of government officials	97.2	87.4	60.8
7. Understand factors related to production of goods and services	98.4	93.3	70.2
8. Understand and apply information about how private business functions	96.8	87.8	67.5
9. Understand how government functions in U.S. economy	97.9	91.6	68.1
10. Predict how change in economy will result in other changes	96.5	88.5	68.3
11. Make rational personal economic decisions	95.9	88.8	66.6
12. Recognize the rights and responsibilities of consumers	96.6	91.0	75.5
13. Understand use and handling of money and investments	96.3	86.1	60.0
Number of students tested:		67,538	
Number of students who mastered all state objectives:		36,931	(54.7%)
Number of students passing this subtest:		52,337	(77.5%)

I. Statewide Results of 1978 Criterion- and Norm-Referenced Sixth Grade Test

Part I: Criterion-referenced section

Reading

Objective (Learner will . . .)	*% Mastered	% of Correct Responses for each item		
1 Understand medical terms and instructions	57	56	48	67
2 Understand caution labels on bottles,etc.	77	92	72	67
3 Select use of items based on consumer terms	83	87	90	72
4 Respond properly to road signs	78	64	86	86
5 Follow simple directions	83	85	81	83
6 Understand common information signs	62	85	60	40
7 Use building floor plan and schedule	68	84	77	43
8 Recall facts from handbook on safety	57	59	70	43
9 Know how to use a street guide and its map	53	40	67	51
10 Be able to fill in blanks on a form	59	70	60	47
11 Select use of product based on ingredients	73	85	82	53
12 Know how to use telephone directory	82	84	86	75
13 Know how to use a building directory	82	91	67	87
14 Identify items from a business statement	63	77	62	49
15 Know how to use an entertainment guide	73	89	46	84

Part II: Norm-referenced section

The norm-referenced section of the test was normed against a national sample by Science Research Associates, Inc. (SRA), using SRA Achievement Series Scores Reading Form ES Green. The average score for the 34,974 Missouri students taking this test in 1978-79 was at the 54 percentile, compared to the national norm of 50 percent.

Mathematics

Objective (Learner will . . .)	*% Mastered	% of Correct Responses for each item		
1 Know how to make change	73	70	75	74
2 Find total income from avg. weekly income	89	88	89	89
3 Calculate wages from hourly rate and hours	64	79	55	58
4 Determine and compare unit costs	42	43	45	39
5 Find take home pay from salary and deduction	65	64	65	67
6 Figure daily amounts from weekly budget	27	24	33	24
7 Find multiples of itemized weekly expenses	71	70		68
8 Compute a sales slip, including tax	50	48	51	50
9 Estimate weekly savings to buy an item	52	47	53	55
10 Calculate weekly wages from piecework rate	56	64	55	60
11 Compute monthly rate to repay a debt for a year	46	45	50	44
12 Compute total and average scores in sports	50	52	50	48
13 Find total materials cost from unit costs	44	39	41	52
14 Determine recipe amounts from different size groups	52	61	36	58
15 Calculate distance from time and rate	72	72	72	72

The norm-referenced section of the text was normed against a national sample by Science Research Associates, Inc. (SRA), using SRA Achievement Series Scores Math Form ES Green. The average score for the 34,987 Missouri students taking this test in 1978-79 was at the 59 percentile, compared to the national norm of 50 percent.

TABLE 43
STATUS OF OTHER PROGRAMS

A. School Food Services—1978-79

LEA'S APPROVED	SCHOOLS PARTICIPATING	SCHOOL ENROLLMENT	AVERAGE DAILY ATTENDANCE
925	2,664	1,005,197	907,754

CASH REIMBURSEMENT (FEDERAL)					CASH REIMBURSEMENT (STATE)		
School Lunch	Special Milk	Breakfast	Nonfood Assistance (Equipment)	Cash in Lieu of Donated Food	School Lunch	Value of Donated Food (Federal)	Total Federal and State Assistance
$37,810,357	$2,833,805	$2,702,008	$406,795	—0—	$3,535,881	$14,459,488	$61,748,334

SELECTED STATISTICS—1978-79

An average of 601,151 students were served lunch daily during November for an all time high.
62 percent of the enrollment and 69 percent of the ADA participated in the lunch program daily.
101,852,891 Type A lunches were served children.
32,096,592 lunches were served free or at reduced price to needy children.
755,189 units of government donated food were distributed.
School food services represented a $119.4 million industry.
Food cost amounted to $68,407,125.
$41,422,938 were paid in salaries at the local level.

B. Driver Education Data

Year	Districts Offering Driver Education	Districts Offering Special Education Driver Education	Eligible Students	Students Receiving Driver Education	Driver Education Teachers	Estimated Average Cost Per Pupil
1978	447	200	91,050	68,000	765	110.00
1979	434	242	82,959	51,012	431	120.13
